DETAILED ACTION

1. Claims 1-41 in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose alone or in combination:

Regarding Claims 1, 8 and 14, where the reference of Xue [148] and other prior art(s) of record does not teach controlling the operation of the actuator using the first voltage, providing the second voltage to the device, a second voltage that is lower than the first voltage. Applicant argued that the Xue [148] voltage applies to both the actuator and the device is identical and teaches the battery provides and the device operates at identical voltage. Examiner agrees with this assessment and the current argument and amendment overcome Xue [148] as well as other prior art(s) of record.

Regarding Claim 20, the prior art(s) of record does not disclose alone or in combination all the components/structure in the current invention and the activation of the third relay deactivates the second relay, and wherein the first relay is deactivated by the switch opening, the deactivation of the first and second relays causing the dc chopper module to deactivate, thereby stopping the second voltage from being outputted.

Regarding Claim 32, the prior art(s) of record does not disclose alone or in combination all the components/structure in the current invention and the activation of the first and second relays causes the first voltage to be applied to the control line, thereby activating the dc chopper module and the third relay, and wherein the third relay deactivates the second relay and opening the switch deactivates the first relay, thereby removing the first voltage from the control line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
